Surface Mount Intelligent Electric Bolt for Double Door
Model:YB-500HD(LED)

YLI ELECTRONIC
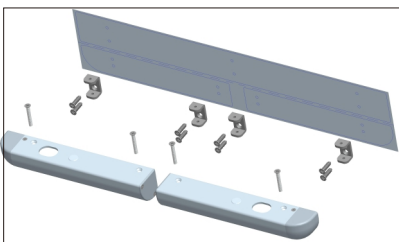

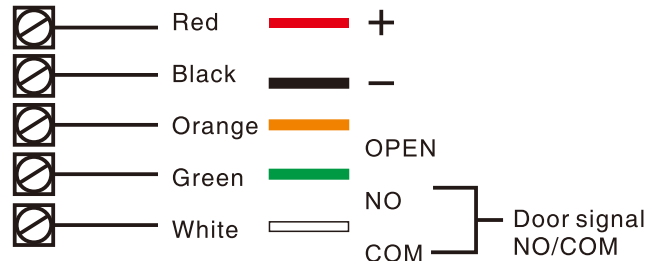

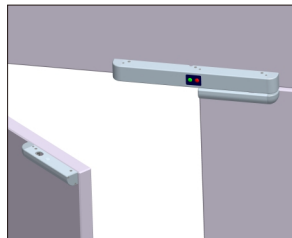

CE | ETS Germany | EMC tested | CMA

Parameters

Face Plate	428Lx45Wx38H(mm)
Bracket	204Lx35Wx35H(mm)
Signal Output	Door signal NO/COM
Time Delay	0/3/6/9 sec
Voltage	12VDC
Current	Start 1Ax2 ; Standby 0.18Ax2
LED	Green light when unlocked, Red light when locked
Induction Distance	8mm
Feature	fail secure (NC); fail safe (NO)
Suitable for	Sturdiness Electric Bolt for Narrow Door

Dimensions
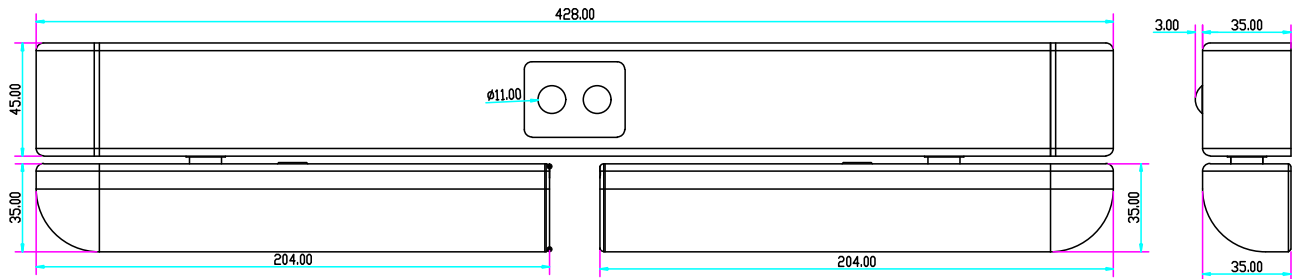

Installation&Wiring Diagram

Red — +
Black — −
Orange — OPEN
Green — NO
White — COM

Door signal NO/COM

Under circumstance that two door are closed correctly by detection,lock will release signal
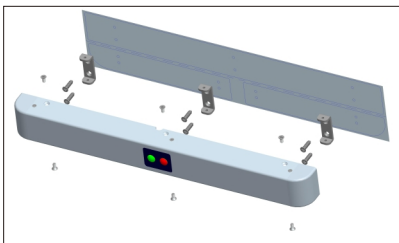

Installation:

1,based on the gap between door and door frame,then decide if you need to cut off hole-cutting instruction paper,original setting of gap is 5mm

2,paste hole-cutting instruction paper on proper position,install U bracket base as instruction(base in accessory bag)

3,as shown,lock body and latch should be on appropriate position,fasten them by KM
